PREFACE

The need for supplying potable water to people through organized water supply stems from the fact that water as an essential requirement is inextricably linked to the state of human health. Polluted water constitutes a grave danger to human health. Nitrates and fluorides in water cause blue baby syndrome, fluorosis and carcinogenic effects. Lead, mercury, cadmium, nickel and iron can cause kidney ailments and cancer. Pesticides in water can cause carcinogenic effects and neurological ailments. According to the “World Water Development Report 2”, of the United Nations, diarrhoea is the leading cause of death from water-borne diseases in children. In 2002, diarrhoeal diseases accounted for 1.8 million deaths. These were almost entirely children under 5 years of age.

There are still millions of people in the world who do not have access to safe drinking water. The poor are the worst affected in this regard. For poor, access to potable water may involve trekking long distances, long waits, tiring trips back home with jerry-cans etc. Water chores take up a substantial part of women’s and girls’ time. This is because the responsibility of bringing water from long distances generally falls on women and girls. According to the “Human Development Report - 2006” of the United Nations Development Programme, about 1.1 billion people in the developing world do not have access to even minimal quantity of clean water. Most of these use about 5 litres a day (per capita) – one tenth of the average daily amount used in rich countries to flush toilets. The daily average per capita consumption in Europe is more than 200 litres and in the United States, the figure is more than 400 litres.

It is not just enough to ensure accessibility to safe drinking water. What is important is to provide safe drinking water to each and every citizen within the premises. Further, water should also be supplied in adequate quantity. The best scenario relating to water supply is one where each and every household gets 24x7 water supply.

What is the scenario with regard to access to safe drinking water (tap water) in the cities and towns of India? How many households have access to tap water irrespective of location of the tap, within the premises, near the premises and away from the premises? The instant document, which has been compiled on the basis of

the data of Census of India, 2001, answers these questions. The Census of India, 2001 provides data pertaining to access of households to drinking water by source and its location. The data does not include institutional households. The various types of source of water supply cover tap, hand pump, tube well, well, tank, pond, lake, river, canal, spring, and others. The location of source of drinking water has been classified into three categories based on the distance, viz., “within the premises”, “near the premises” (i.e., when the available source is located within a radius of 100 metres in urban areas and 500 metres in the case of rural areas) and “away from the premises”. The drinking water source has been considered “away”, if it is located beyond 100 metres for the households in urban areas and more than 500 metres for the households living in rural areas.

I wish to place on record my appreciation for the efforts put in by Shri J. Nagarajan, Senior Social Scientist and his team consisting of Shri B.K. Bharti, Senior Research Officer, Shri K.L. Buttan, Research Officer, Shri C.A. Lokesh, Shri P.P. Tuteja and Shri T. Tete, for bringing out this document.

It is hoped that the document will be found very useful by administrators, policy makers, urban planners, researchers and others involved in the field of urban development.

New Delhi.
September, 2007.

(J. B. Kshirsagar)
Chief Planner

CHAPTER I

Access to Tap Water

(Irrespective of location of the tap)

The access of households to tap water (organized protected water supply through taps) in cities and towns of the country, as per the Census of India - 2001, can be seen in the Annexure . The important findings relating to access of households to tap water, irrespective of location of the tap, are given below:

I Percentage range of households having access to tap water : 0 – 100 %

II Cities / towns where the highest percentage of households having access to tap water is 100%

S.No.	City / Town	State
1	OmerkhanDaira	Andhra Pradesh
2	Bongaigaon R. P.C. Ltd Township	Assam
3	Bharuch INA	Gujarat
4	GSFC Complex INA	Gujarat
5	Jawaharnagar (Gujarat Refinery)	Gujarat
6	Kalol INA, Gandhinagar District	Gujarat
7	Kalol INA, Panch Mahals District	Gujarat
8	Limla	Gujarat
9	Vasna	Gujarat
10	Kotkhai	Himachal Pradesh
11	Naina Devi	Himachal Pradesh
12	Vehicle Fac.Jabalpur	Madhya Pradesh
13	Kondumal	Maharashtra
14	Dariba	Rajasthan
15	Indian Telephone Industry, Mankapur	Uttar Pradesh
16	Kedarnath	Uttaranchal
17	Roorkee	Uttaranchal
18	Ichhapur Defence Estate	West Bengal

III. Cities / towns having the lowest percentage (0%) of households having access to tap water

S.No.	City / Town	State
1	Paharpur	Bihar
2	Katpar	Gujarat
3	Kharsawan	Jharkhand
4	Jeron Khalsa	Madhya Pradesh
5	Naigarhi	Madhya Pradesh
6	Heirok	Manipur
7	Mamit	Mizoram
8	Sairang	Mizoram
9	Zawlnuam	Mizoram
10	Khodarampur	West Bengal
11	Uttar Kalas	West Bengal

IV. Cities / towns where percentage of households having access to tap water, is below 1% (excluding 0%)

S.No.	City / Town	State
1	Jarjapupeta	Andhra Pradesh
2	Ramapuram	Andhra Pradesh
3	Anand Nagar	Assam
4	Basugaon	Assam
5	Bijni	Assam
6	Bilasipara	Assam
7	Bohari	Assam
8	Jonai Bazar III	Assam
9	Mankachar VIII	Assam
10	Sarthebari VI	Assam
11	Udalguri IV	Assam
12	Amarpur	Bihar
13	Bahadurganj	Bihar
14	Banmankhi Bazar	Bihar
15	Ghoghardiha	Bihar
16	Jhanjharpur	Bihar
17	Kasba	Bihar
18	Kataiya	Bihar
19	Mohiuddinagar	Bihar

V. Distribution of cities / towns by percentage range of households having access to tap water

S.No.	Percentage range of households having access to tap water	Number of towns	Percentage to total number of towns
1	0 - 10	511	9.90
2	10 - 20	347	6.72
3	20 - 30	352	6.82
4	30 - 40	395	7.66
5	40 - 50	410	7.95
6	50 - 60	435	8.43
7	60 - 70	560	10.85
8	70 - 80	636	12.33
9	80 - 90	725	14.05
10	90 - 100	789	15.29
Total		5160	100.00

CHAPTER II

Access to Tap Water Within the Premises

The access of households to tap water within the premises in cities and towns of the country, as per the Census of India – 2001, may be seen in the Annexure. The important findings pertaining to access of households to tap water within the premises are given below:

- I. **Percentage range of households having access to tap water within the premises : 0 – 100 %**
- II. **Cities / towns where the percentage of households having access to tap water within the premises is 100%**

S.No.	City / Town	State
1	GSFC Complex INA	Gujarat
2	Jawaharnagar (Gujarat Refinery)	Gujarat
3	Dariba	Rajasthan
4	Ramachandrapuram(BHEL)Townshipship	Andhra Pradesh

- III. **Cities / towns where the percentage of households having access to tap water within the premises is between 90 – 100%**

S.No.	City / Town	State
1	Gaddiannaram	Andhra Pradesh
2	Eddumailaram	Andhra Pradesh
3	Bongaigaon R. P.C. Ltd Township	Assam
4	Chhawala	Delhi
5	Siras Pur	Delhi
6	Sanoth	Delhi
7	Vapi	Gujarat
8	Valsad INA	Gujarat
9	Anklesvar INA	Gujarat
10	Freelandgunj	Gujarat

VI. Distribution of cities / towns by percentage range of households having access to tap water near the premises

S.No.	Percentage range of households having access to tap water near the premises	Number of towns	Percentage to total number of towns
1	0 - 10	2322	45.00
2	10 - 20'	1159	22.46
3	20 - 30	679	13.16
4	30 - 40	449	8.70
5	40 - 50	294	5.70
6	50 - 60	157	3.04
7	60 - 70	60	1.16
8	70 - 80	26	0.50
9	80 - 90	11	0.21
10	90 - 100	3	0.06
Total		5160	100.00

CHAPTER IV

Access to Tap Water Away from the Premises

The access of households to tap water away from the premises in cities and towns of the country, as per the Census of India – 2001, may be seen in the Annexure. The important findings with regard to access of households to tap water away from the premises are given below:

I. Percentage range of households having access to tap water away from the premises : 0 - 73.99 %

II. Cities / towns having the highest percentage (73.99%) of households having access to tap water away from the premises

S.No.	City / Town	State
1	Lamjaotongba	Manipur

III. Cities / towns where the percentage of households having access to tap water away from the premises is either 50% or above but less than the highest percentage of 73.99%

S.No.	City / Town	State
1	Chhotaputki	Jharkhand
2	Ghogha	Gujarat
3	Chakapara	West Bengal
4	Digboi V	Assam
5	Bedi	Gujarat

IV. Cities / towns where the percentage of households having access to tap water away from the premises is zero

S.No.	City / Town	State
1	Jarjapupeta	Andhra Pradesh
2	Kothavalasa	Andhra Pradesh
3	OmerkhanDaira	Andhra Pradesh
4	Palakurthy	Andhra Pradesh
